BANDARU GEETHIKA MAHALAKSHMI

geethikamaha105@gmail.com | 9160546049 | LinkedIn: Bandaru Geethika Mahalakshmi

PROFESSIONAL SUMMARY

Computer Science Engineering student with a strong academic record and hands-on experience in Java, Python, SQL, application development, and data analytics. Experienced in building practical projects using Flutter, Firebase, MySQL, and JDBC, with a strong interest in problem-solving, software development, and emerging technologies. Demonstrated teamwork and leadership through hackathons and collaborative project development.

EDUCATION

Lendi Institute of Engineering and Technology – Jonnada 2028

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Currently Pursuing – 3rd Year | Expected Graduation – 2028

CGPA: 9.2/10

HACKATHONS & LEADERSHIP

Hackathon Team Lead – LNIT Summit

- Led and coordinated a team during the hackathon, distributed tasks, supported project development, and helped ensure timely completion of deliverables.

Hackathon Lead & Participant – NSRIT HackYatra

- Collaborated with team members to develop a solution for a real-world problem, contributing to project development and working effectively within the hackathon timeframe.

CERTIFICATIONS

Data Analytics with Python – NPTEL

AWS Academy Graduate – Machine Learning Foundations – AWS Academy

Quantum Computing Virtual Internship – AICTE–EduSkills

SKILLS

Programming Languages: Java, Python, SQL

Databases & Backend: MySQL, JDBC, Firebase, Database Management

Data & Analytics: Data Analytics, Machine Learning

Development: Flutter, Application Development

Soft Skills: Problem Solving, Team Leadership, Collaboration

PROJECTS

SmartCart – Smart Supermarket Self-Checkout App

- Developed a Flutter-based mobile application for supermarket self-checkout. Implemented barcode scanning, Firebase Authentication, and Cloud Firestore for user and cart management, with digital payment integration to support a faster and more convenient shopping experience.

SpendWise – Smart Expense Analyzer

- Developed a Java Swing desktop application for personal expense and income management. Used MySQL and JDBC for storing and retrieving user and transaction data, with expense tracking, category-wise analysis, and graphical reporting features.
